

aria

20W

Finally, a telephone system that doesn't tie your company down. LG aria-20 Wireless is a cost-effective wireless telephone system that enables your staff the ability to answer their calls on the move. Effective, reliable and fast communications are key elements for any successful business. The LG aria-20 Wireless meets all these needs and more.

Imagine an office without wires

All features have been designed to simplify your operations, make business easier and improve your efficiency. Wireless freedom, flexibility and mobility in your organisation leads to fewer missed calls and more importantly less missed revenue.

Mobility

Today's environment dictates that your staff be highly mobile. Mobility helps increase the efficiency and productivity of your organisation. Staff remains contactable at all times, ensuring decisions are made without delay and staff are able to manage their day more effectively.

Cost Effective

Your staff will also receive more calls, first time, guaranteeing lower phone bills through less returned calls. Customers will be impressed and keen to do business with such a responsive, efficient and customer focussed business.

Total Coverage

Total coverage of your premises can be achieved by strategic placement of base stations. Your staff can roam around your premises effortlessly, without calls being dropped - thus creating your own private mobile network. And of course any internal calls are free of charge.

Wireless Solution

A wireless solution for any small business requiring all the features and benefits of cordless telephony, found only on expensive larger telephone systems, at an affordable price. Applications such as warehouses, retail stores, leisure centres, car yards, nurseries, hospitals are all perfect for the LG aria-20W.

Flexibility

To take advantage of your wireless world, your 20W already incorporates one wireless circuit as standard. As your business is ready to take advantage of wireless applications - your 20W is already equipped to lead the way. Not only can your 20W be tailored to meet your current needs it can grow as your organisation grows.

Desktop Options

The 20W supports LG aria Select 2, 8 and 30 button desktop keystations, as well as your fax machines and standard analogue telephones. The real advantage is its wireless capabilities. The 20W also supports up to 20 DECT cordless handsets. Light, compact, stylish, portable and easy to use LG aria DECT handsets are perfect for staff who are constantly on the move.

Manufactured for the Australian market by LG - one of the world's largest manufacturers of electronic products and a world leader in the field of digital technology - the 20W utilises this technology to give you superb system features and presents a professional 'big company' image to your customers and callers.

Support

With a current installed base exceeding 30,000 systems, LG aria systems supported by a national network of more than 110 trained and approved dealers. To further enhance the support offered by your Aria approved dealer, Aria Communications have fully equipped system support laboratories at our National Support Centre in Melbourne. In addition, the systems have the comprehensive support of LG who currently operate in over 150 countries around the world.
